Viege Column

Thinning of the scalp  
头发变得稀疏

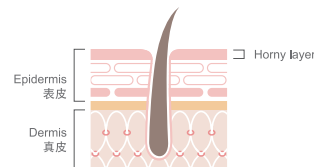

Due to the lack of collagen, the scalp loses its suppleness and hardens. This causes the scalp to lose its elasticity, experience a decline in cellular and capillary activity due to poor blood circulation and various other defective functions. These deteriorating effects result in a thinning scalp that loses the strength to support the hair shaft and becomes unable to sustain the growth of healthy hair.

头皮因老化而导致胶原蛋白减少、再生能力下降与变形，失去了其厚度与硬度。这种情况将导致头皮失去了弹性、细胞和毛细血管减少、血液循环不良和其他功能等出现缺陷，进而使头皮状况恶化。变薄的头皮失去了支撑头发的能力，无法生长出健康的头发。

<Scalp and hair with advanced aging>  
<提早老化的头皮和发丝>

The scalp becomes thin and loses elasticity making it less able to support the hair. 头皮变得稀薄和失去弹性，以致无力支撑发丝

<Healthy scalp and hair>

The scalp is plump, thick, and elastic for proper hair support. 头皮丰盈、浓密且有弹性，能全面地支撑发丝。
